- The prior art made of record and not relied upon is considered pertinent to 2. applicant's disclosure. Shiraki et al teaches connection via rotation but the two units are dissimilar therefore their electrical connection members are not the same. Orr teaches stacked rotating connection but no electrical connection. Householder teaches stacked electrical connection but among other things no plate. Yoshigi et al teaches a rotating electrical connection but no lighting or similar units. Glick et al teaches an electrical connector with rotating connection along with a resilient contact between terminal portions but no lighting, stacked units or connection member extending between ends. Johnescu et al teaches stacked units but no plate or lights. Jautz teaches stacked light units with electrical connection members extending between ends and terminal portions and a plate but no rotation and the terminals are not provided with the plate and no contact portions capable of resiliently establishing contact.
